nicolaszanghi.com

Developer of innovative web applications and database management systems for more than 10 years.

I am 31 years old, I'm from Geneva, Switzerland, and I am currently based in Kinshasa, DRC.

For the past five years, I have been leading the web business of a Swiss-based multimedia creative company. In this context I was responsible for the development of the Solar Impulse project site as well as the development of sites for the University of Geneva and for Radio-Télévision Suisse, among others.

I am passionate about programming since I was 16 years old. I like finding solutions to challenges that are out of the ordinary and I am constantly training on new technologies.

Today, I work as a freelancer for projects in Switzerland and I am looking for new opportunities here.

Achievements

Solar Impulse

Responsible for the development of the website: solarimpulse.com
